

EXPERTS IN CONTROL, AUTOMATION AND TEST

# What We Do

**Novator Solutions AB**, part of Novator Consulting Group, develops systems for customers both as consultants in customer projects, and as suppliers of complete turn-key systems, including mechanics, electronics, assembly, installation, maintenance, and support.

# Who We Are

Novator Solutions engineers are highly skilled in developing control, automation and test systems. We have extensive experience on National Instruments hardware and software platforms, especially LabVIEW™, TestStand™, and VeriStand™ with more than 100 years of combined experience on working with these tools. A key to our success is close contact and cooperation with National Instruments as their alliance partner.

# Who Our Customers Are

Our customers are often production managers, development managers or technical buyers, who value our expertise. Some companies and applications we have worked with are:

- **Scania** – rest rig system development for real-time operation
- **Ericsson** – radio base station test software
- **Electrolux** – dishwasher performance test software
- **Volvo** – hardware-in-the-loop system for environment simulation
- **GE Healthcare** – environment for chromatograph modules test

We can help you with a range of applications from desktop data logging all the way to company-wide test and measurement frameworks.

# What Can We Do for You?

We provide great expertise in control, automation, and test. Some examples are:

- HIL system development with LabVIEW or Veristand
- Test and measurement systems for R&D and production with LabVIEW and TestStand
- Vision and Real-Time systems expertise
- High-speed and high data volume measurement systems
- Turnkey systems
- Hourly consulting

Our goal is to deliver top quality, excellent usability and 100% customer satisfaction.
